

SPACE AND SERVICES REQUIREMENT

IMMERSIVE TUNNEL - MISK ART WEEK 2026

05 - 10 DECEMBER 2026, RIYADH

PREPARED FOR:

PLOP Makers - for venue reservation

REFERENCE:

MRD-SR-2026-1007

DATE:

07 October 2026

SPACE TO RESERVE

6.0 m x 37 m = 222 m²

TUNNEL SIZE OPTIONS

CONFIGURATION	TUNNEL RUN	SCREEN REQUIRED	FOOTPRINT TO RESERVE	AREA
Minimum	12 m	97 m ²	6.0 x 18 m	108 m ²
Typical	22 m	178 m ²	6.0 x 28 m	168 m ²
Maximum	31 m	251 m ²	6.0 x 37 m	222 m ²

Cross-section.

Arched walk-through, 3.0 m internal clear width by 3.2 m internal clear height (vertical walls to 1.7 m, then a semicircular crown of 1.50 m radius). Screen wraps the walls and crown at 8.1 m² per linear metre. Clear width stays above 2.8 m at head height. External structure width 4.0 m. A 2.4 x 2.8 m section is available where the hall is tight, but consumes only 7.0 m² per metre and so runs about 16% longer for the same screens.

SERVICES TO RESERVE

Electrical supply	Three phase 125 A at 400 V at the stand. 100 A minimum for the smaller configuration.
Clear height	4.0 m minimum to the underside of all services, rigging and lighting bars.
Floor loading	Venue to confirm the rating in kN/m ² . Load is concentrated through base plates and ballast.
Load in	Door and route to accept structural steel and palletised LED cabinets. Vehicle access preferred.
Emergency egress	Venue to confirm maximum travel distance. A mid point exit may be required on runs over 25 m.
Build and strike	Access from 01 December for build, and from 11 December for dismantle.

NOTES

- The footprint includes 1.0 m working clearance to each side for build and in-run maintenance, and 3.0 m clear at each end for approach and crowd management.
- The tunnel run is set by the screen inventory released from the immersive room package. Final dimensions are confirmed against the cabinet schedule.
- A narrower cross-section consumes screen more slowly and therefore produces a longer run. Where floor space is constrained, the wider cross-section is preferred.
- Where a straight run will not fit the hall, the same tunnel folds into an L or a horseshoe. A 31 m run folds into approximately 13.0 x 16.5 m for a comparable area.
- Reserve the maximum. Space can be released closer to the event; additional space cannot be secured in build week.
- Dimensions assume an indoor location. An outdoor position requires weather protection and a different structure.
